# CAKE CONCENTRATES

## DESIGNER LIVE RESIN

### What is Live Resin?

Live Resin is a cannabis concentrate extracted from freshly harvested marijuana plant material that's been flash-frozen at sublevel temperatures, blasted with solvents like butane, propane, or butane hash oil, and pressed.

**Live Resin retains a broader spectrum of cannabinoids and terpenes than extracts from dried and cured plants.**

Total Cannabinoids: 580.70mg

**SATIVA**  
Lebanese Gold

### HASH MASTERY

*Sitka Special Press™ is born from the age-old symbiotic relationship between hashmaker and grower. We seek the best genetics from our favorite farms and work with growers to create single source, strain specific traditional dry sift hashish that exhibits the unique characteristics of the strain like never before.*

*Traditional hashish is a great addition to any bowl, joint, or spliff, but on its own is where it really shines. Try it using hashish smoking methods such as a hash dome, hot knives, sebsi, or simply roll it out into a cylinder, light the end, blow it out like a stick of incense and inhale the rich, flavorful smoke.*

## PURE ROSIN \$80/GRAM

*Please ask your Budtender about available Flavors/strains!*
