**ABOUT L'ORANGE**

This lemony orange Cannabiotix creation is a cross between the award winning Hybrid, Orange Crush and our uplifting Lemonburst. This unique citrus terpy flower takes her time to mature, but is well worth it, as it's known: all good things take time. The buds possess extremely sticky resinous trichomes that cling to your fingertips when broken down and fill the room with a nostalgic aroma reminiscent of sliced oranges served up at halftime of your childhood youth soccer game. Known for having a cerebral "happy" high, this strain provides a euphoric buzz that is great for relieving anxiety and depression.

**GM-UHOH**

LINEAGE: CHEMDAWG X FORUM COOKIES

**ABOUT GM-UHOH**

A new age staple, GMO aka GM-UHOH aka Garlic Cookies, is a stupid funky cross between Chemdawg and Forum Cookies, known for its incredibly unique terpene profile and soothing high. A mix of garlic, onion, mushroom, and gas, gmo is an indica dominant hybrid that hits just as strong as it smells. These light green, spade-shaped buds are draped in crystals and feature orange hairs throughout with the occasional streaking violet hue. It has been said that this potent smoke (testing between 32%-36% thc) can lead to a state of sedation and tranquility; GMO is known to help with chronic pain, anxiety and nausea.

**BLUE FLAME OG**

LINEAGE: THICC MINT COOKIES X PRIVATE RESERVE OG

**ABOUT BLUE FLAME OG**

This mutant runt of our award-winning Thicc Mint Cookies crossed with our Private Reserve OG is one of the most unique flavors of the CBX Genetic Library, spanning cult classics such as our award-winning Kush Mountains and Casino Kush. A potent smoke for the experienced smoker, this true pressure OG will have you wiping the sweat from your forehead after just a couple hits and a heavy-headed high that will have your eyes feeling extra droopy as you take a soothing, sedating, and tranquil journey through the history of true old school California Kush. Sticky and resinous with unique hints of aquamarine coloring, these dense glistening gems of pure fire have very little leaf for maximum roll-up potential and can help with insomnia, anxiety, and chronic pain.

SATIVA	INDICA	HYBRID	HYBRID	HYBRID
Durban Poison is a pure sativa originating from the South African port city of Durban. It has gained popularity worldwide for its sweet, earthy smell and citrus, piney flavor.	Distinct, sweet grape-like aroma. A flavor profile with a slight, spicy earth accent that carries over from its Afghani lineage. The effect profile provides a carefree relaxation that has been reported to help soothe pain, stress, and anxiety.	Fire OG has potent and long lasting euphoric effects and also leads into an intense couch lock in which you'll feel sedated with an immense case of the munchies.	For its incredible flavor profile, medical marijuana patients choose Mojito to help relieve symptoms associated with headaches, inflammation, & depression.	Apple Fritters high starts almost immediately, lifting your mind, relaxing your aching muscles, and leaving you completely at ease. Also known to help relieve chronic pain, depression, insomnia, mood swings and stress.
